Introduction

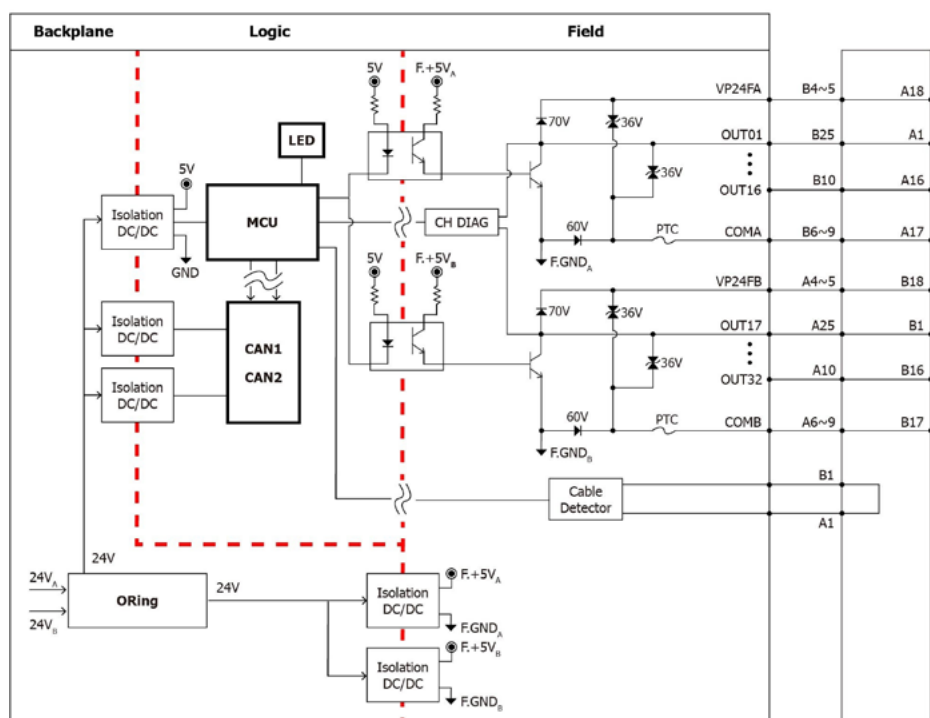

R-9041 is equipped with 32 NPN digital output channels (sink mode), each capable of driving a 0.1A load. It provides LED indicators for the ON/OFF status of each output channel and supports disconnection detection between the module and terminal board. Additionally, it features 3000VDC isolation between channels and backplane bus, enhancing its ability to resist noise interference in industrial environments without affecting the operation of the RIO-98x0 system.
